

This drawing is the property of Cathodic Anodes Australasia. To be used with permission only. This drawing becomes an uncontrolled document once issued as hard or electronic copy. Customer to confirm current revision of drawing prior to ordering.

### SCENARIO 1 (Quantity 168)

### SCENARIO 2 (Quantity 36)

- Notes
- Anodes are cast to comply with CAA's standard casting tolerances
  - All sharp edges removed for safe handling
  - Anode insert material to meet relevant Australian/International specifications

| Chemical Composition Limits               |           | Alloy:<br><b>Z1</b> |
|---|-----------|---------------------|
| Standard: AS2239* (Most current revision) |           |                     |
| Element                                   | min.      | max.                |
| Cadmium                                   | 0.025     | 0.07                |
| Aluminium                                 | 0.10      | 0.50                |
| Silicon                                   | -         | 0.005               |
| Copper                                    | -         | 0.005               |
| Iron                                      | -         | 0.005               |
| Lead                                      | -         | 0.006               |
| Other Impurities                          |           |                     |
| - each                                    | -         | 0.005               |
| - total                                   | -         | 0.02                |
| Zinc                                      | remainder |                     |

\* Corresponds to MIL-DTL-18001L alloy composition

Scenario 1: 3.7kg Nett (nominal)  
Scenario 2: 5.5kg Nett (nominal)
